# TYPICAL MOUNTING LOCATION AND METHODS

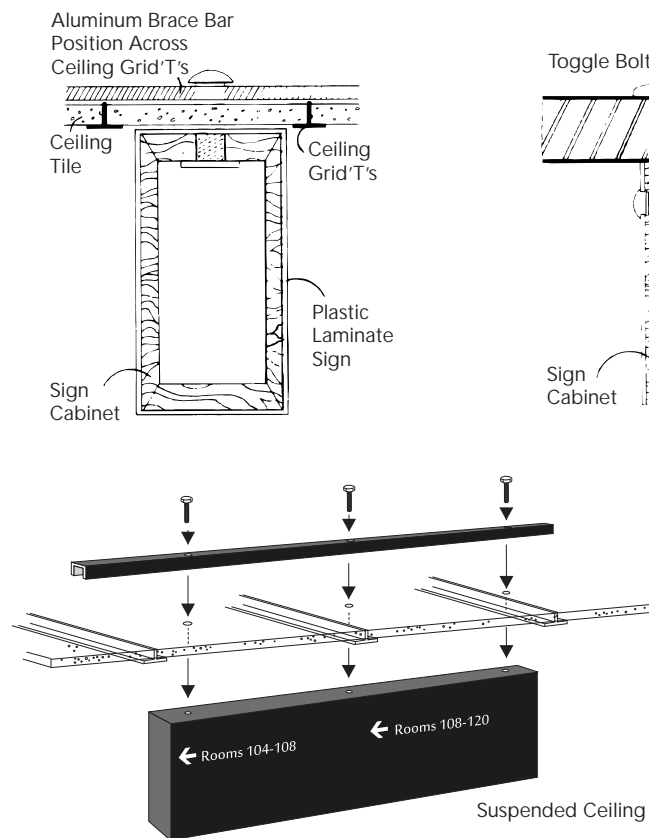

**\* Tactile signs are to be mounted on the latch side of the door, 2" from the door frame, 48" minimum, 60" maximum measured to the baseline of the raised characters. Ideally, but not a requirement, braille should be placed at one consistent height whenever possible.**

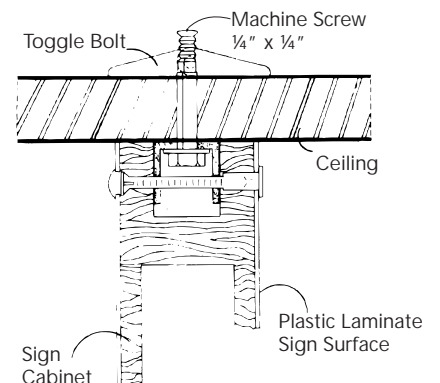

## MAIN DIRECTORY

## SUSPENDED CEILING

## SOLID CEILING

### Main Directory Modules

are fabricated in the form of a dimensional box cabinet. The faceplate is a single removable section of clear acrylic. The header panel is silkscreened. Individual strip inserts are magnetically attached to the inside surface of the cabinet. Mounting brackets are provided with the cabinet for installation. A special suction cup is supplied for removal of clear acrylic faceplate.

**EXAMPLES OF USE**

MODULE 25.0  
File Holder  
with Sign Band

MODULE 25.1  
File Holder  
without Sign Band

As a standard the File Folder is offered in black acrylic. The Sign Band functions in the same way as all of the sign Modules of the INNERFACE System, with a changeable insert. The Sign Band is offered in the same standard system colors.

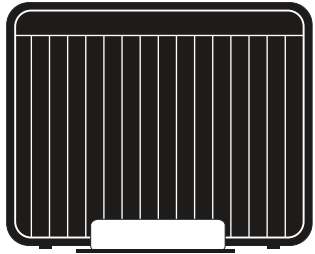

MODEL 25.1/A  
Insert Strip

MODULE 26.0  
Paper Grip  
5-1/2" x 1-3/4"

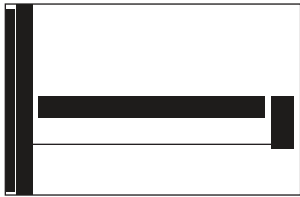

Available in Natural Aluminum and Bronze

MODULE 27.0  
Medical Insert Kit  
For Use w/  
MODULE 4.1 - 4.4

MODULE 27.6  
Medical Insert Kit  
For Use w/  
MODULE 6.1 - 6.4

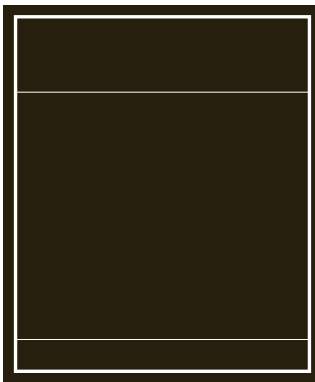

The Medical Insert Kit comes supplied with 25 each of 16 pre-printed message strips, and a supply of blank strips for special messages. The following messages are featured. No Smoking, No Visitors, Radiation in Use, Isolation, Oxygen in Use, Check with Nurse, Immediate Family Only, Intake/Output, Your Nurse is \_\_\_\_\_, Procedure in Progress, Respiratory Isolation, Wound and Skin Precautions, Complete Bed Rest, Liquids Only, Two Visitors Only and NPO.

MODULE 28.0  
Letterguide  
18" x 24"

Please call for information on ordering additional strips.

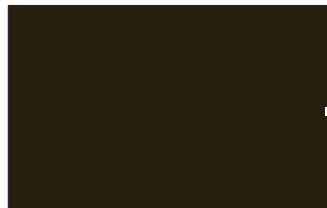

The Letterguide Kit contains the Letterguide Board, Format Guide, Triangle, Scale, X-acto Knife with Blade, Squeegee and Burnisher for in-house maintenance of you INNERFACE signage system.

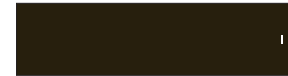

MODULE 29.0  
Fire Evacuation  
Plan/ Announcement  
Events/Menu  
14" x 11-3/4"

Accepts standard 8 1/2" x 11" paper

Map inserts available

MODULE 29.0/B  
Window Insert 8-1/2" x 11"

MODULE 29.0/A  
Header Insert 2-15/16" x 11-3/8"

MODULE 29.0/C  
Footer Insert 1-3/8" x 11-3/8"

**METHOD**

**FRONT VIEW**

**SIDE VIEW**

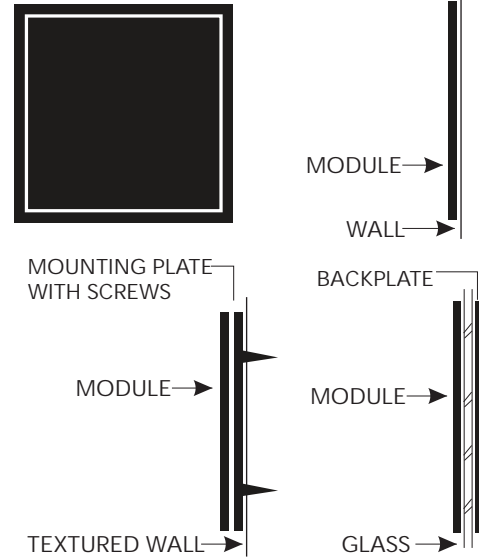

**FLAT SURFACE MOUNTED (FSM)**

This is the most common mounting method and also the technique that can be used for any module of the INNERFACE System. Flat surfaces that the modules are likely to affix to are: walls, doors, windows and desk or counter faces.

In most cases plaque modules and secondary directory modules can be mounted with a two-sided foam adhesive tape. If the mounting surface is textured or resistant to the foam tape, it is advised that a liquid adhesive be used in conjunction with the tape. If the surface is highly textured, it is recommended that a mounting plate be used. The plate is mechanically mounted to the textured surface with screws, then the plaque or directory module is mounted with foam tape to the smooth surface of the mounting plate. The mounting plate with screws is designated (MP/S) on the product sheets.

For glass surfaces when it is desired that the foam tape not be seen through the glass when viewed from the backside, a backplate can be mounted to the opposite side of the glass. The backplate used for glass is designated (MP/G) on the product sheets.

The standard material for mounting plates is black styrene, and backplates are black acrylic.

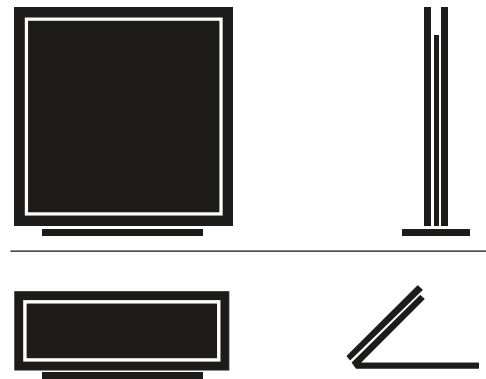

**DESK TOP MOUNTED (DTM)**

Many of the modules of the INNERFACE System can be affixed to a stand that will then allow the module to sit on a desk or counter top. This permits flexibility in positioning the module. All of the stands are available in the form of an inverted "T" or an angled form.

All stands come with felt tabs on the underside. If a non-movable, permanent mounting is desired, foam adhesive tape can be affixed to the underside upon special request.

The desk top mounted method allows the message to be read from two sides if a plaque or directory module is affixed to both sides of the "T" bracket.

The "T" brackets and angled stands are offered in black acrylic as a standard.

**PERPENDICULAR MOUNTED (PEM)**

If a module of the system requires increased exposure it can be mounted perpendicular to the wall surface, thus permitting it to be read as one approaches the identified area.

Many of the modules of the INNERFACE system can be perpendicular mounted by affixing the module to a "T" bracket. The bracket is mechanically mounted to the wall surface with screws.

The perpendicular mounted method allows the message to be read from two sides if a plaque module is affixed to both sides of the "T" bracket. The "T" bracket is black painted steel.

When ordering please contact INNERFACE customer service representatives for further required specifications.

**CEILING MOUNTED (CM)**

Many modules of the INNERFACE system can be affixed to a "U" channel which will then allow them to be ceiling mounted. The "U" channel is mechanically mounted to the ceiling with toggle bolts.

This mounting technique affords increased exposure and reinforcement of the plaque of directional message.

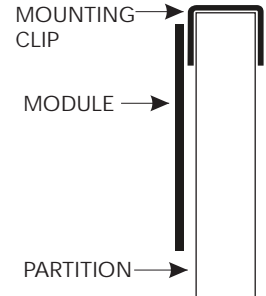

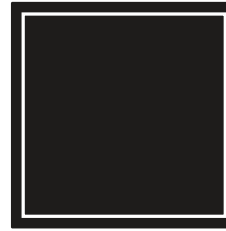

This ceiling mounted method allows the message to be read from two sides if a plaque module is affixed to both sides.

The "U" channel is bronze anodized aluminum.

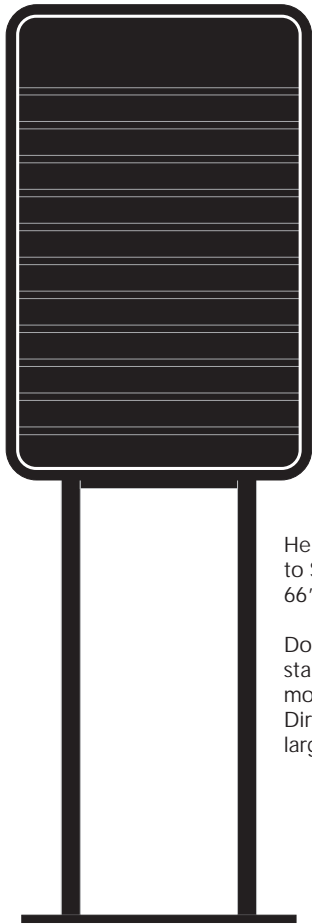

**PARTITION MOUNTED (PAM)**

The standard method of mounting Plaque Modules to partitions is through the use of a clear acrylic clip. The clip is fabricated to fit over the top of the existing furniture system component. INNERFACE offers standard clip sizes and custom sizes are available upon request. The clip's inside dimension varies according to partition thickness.

**H-STANCHION MOUNTED (HSM)**

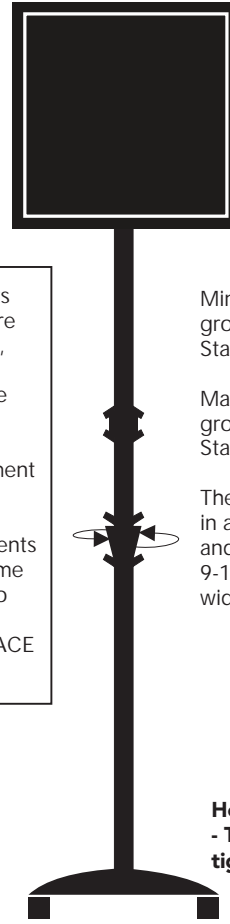

Height from ground to Stanchion top is 66".

Double post stanchion used for most Secondary Directories and large plaques.

**Not Adjustable**

**STANCHION MOUNTED (SM)**

Minimum Height from ground to center of Stanchion top is 42"

Maximum Height from ground to center of Stanchion top is 60"

The Stanchion is offered in a matte black finish and is used for all 8-3/4", 9-1/16", 11-3/4" and 16" wide plaques.

**Height Adjustable - Twist to loosen or tighten and expand**

Certain signage elements must be positioned where there is no available wall, desk, or ceiling for mounting. Other signage elements simply require positioning for high exposure and reinforcement of the message. To satisfy both requirements a freestanding metal frame (Stanchion) is available to mount several of the Modules of the INNERFACE System.

**MODULE SPECIFICATIONS**

MATERIALS: Acrylic and Styrene

FABRICATION: Plaque is to have an 1/8" thick black styrene backplate with a 1/16" thick matte clear, optically- correct acrylic faceplate.

TYPOGRAPHY: All lettering is subsurface, behind the 1/16" acrylic faceplate. Sign messages must be easily changeable with an insert sign plate which is removable only by use of a special tool thus achieving a flexible system while still retaining the appearance of a non-changeable subsurface screen printed sign.

**INSTALLATION:**

Flat surface mounted plaques are to be adhered To the wall and door surfaces with 3M 4416 Foam tape. Silicone adhesive is to be used with the tape for textured surfaces or on wall vinyls with a "Tedlar" finish. If the surface is highly textured it is recommended that a mounting plate be used.

**Optional Mounting Materials:**

1. Magnetic Tape
2. Velcro Tape
3. Pin Mounted
4. Partition Clip
5. Vandal Resistant Mounting
